github.com/muhfees · linkedin.com/in/muhfees · muhfees.vercel.app

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML, CSS

Web & Frameworks: React, Next.js, Node.js, Express, Hono, Angular, Django, FastAPI, Tailwind CSS, Shadcn UI

Databases & Cloud: PostgreSQL, MongoDB, Supabase, Neon, ChromaDB, Convex, AWS EC2, Cloudflare R2

AI / ML & LLMs: PyTorch, LangChain, Ollama, Groq, VAPI, Whisper, Gemini, OpenRouter, RNN/LSTM

Tools: Git, GitHub, CI/CD, Jenkins, n8n, Trigger.dev, Transloadit, Prisma, Zod, Zustand, Clerk, REST APIs, Postman, Jira

EXPERIENCE

Freelance Software Developer

May 2026 – Present

Remote

- Developed and integrated **n8n-based automation workflows** with REST APIs and a custom CMS while gaining practical experience in AI automation and API integration.
- Created an **AI-assisted workflow** to help generate and validate vendor assignments, reducing manual processing time by approximately **60–70%**.
- Enhanced front-end UI components to surface the new workflow system, streamlining vendor-facing task flows
- Managed CI/CD pipelines via Git and Jenkins, maintaining consistent deployments across environments
- Collaborated remotely on software tasks while developing practical experience with **software development, debugging, automation, and deployment workflows**.

PROJECTS

WorkLink | *React 18 · Vite · Tailwind CSS · Radix UI · React Hook Form · Recharts · JavaScript/Typescript* [GitHub](#)

- **Developed** a responsive services marketplace platform for Sri Lanka, enabling users to discover and connect with skilled and semi-skilled service providers.
- **Built** reusable and responsive UI components using React, Tailwind CSS, Radix UI, and Lucide React, focusing on accessible and consistent user experiences.
- **Implemented** interactive forms and user input workflows using React Hook Form, with structured service and marketplace interfaces.

Student ML Pipeline | *Python · Pandas · NumPy · Scikit-learn · Great Expectations · FastAPI · Uvicorn* [Github](#)

- Developed an end-to-end machine learning pipeline covering data ingestion, data validation, preprocessing, model training, and evaluation using Python and Scikit-learn.
- **Built** a FastAPI-based interface to expose machine learning functionality through API endpoints.

Inventory Management System | *C# · .NET · SQL Server · Windows Forms* [Github](#)

- Developed a desktop-based inventory management system using **C# and .NET** to manage products, stock levels, and inventory operations.

EDUCATION

Bachelor in Information and Communication Technology | *University of Vavuniya* **2023 – 2027**

CERTIFICATIONS

- AI For Everyone – DeepLearning.ai
- Flutter and Dart: Developing iOS, Android, and Mobile Apps – IBM
- AMCAT Certified in Software Development & Database Management – Aspiring Minds
- Problem Solving Certificate – HackerRank
